Application/Control Number: 10/583,434

Art Unit: 1657

Receipt is acknowledged of a preliminary amendment filed June 16, 2006
 and a prior art information disclosure statement field May 31, 2007 for this application

which is a 371 of PCT/EP2004/014406 filed 12/17/2004 which claims benefit to EP

03258025.0 filed December 18, 2003.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which

are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to

elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-21 and 28-33, drawn to a method of oxidizing carbohydrates and/carbohydrate derivatives, classified in Class 435, numerous subclasses which includes mainly 100-105.

includes mainly 100-105.

Group II, claim(s) II, drawn to a process for producing D-gluconolactone, classified in Class 435 subclass 126

The inventions listed as Groups I and II do not relate to a single general inventive

concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or

corresponding special technical features for the following reasons Invention Lis drawn to

corresponding appearance in the factor of the following reasons invention the drawn to

oxidized products of carbohydrates or derivatives whereas Invention II is drawn to the

production of a product which requires the formation of a lactone by lactonizing a

product which is not required by Invention I.

Application/Control Number: 10/583,434

Art Unit: 1657

It is considered that Invention I lack a special technical feature as evidenced by the following art. Ciu et al. U.S. 7.138.035.

In addition, Claims 22-27 do not further limit the process of Claim 1.

- 3. Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above <u>and</u> there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:
  - (a) the inventions have acquired a separate status in the art in view of their different classification which requires a separate search for Invention II pertaining to additional steps not required by Invention I;
  - (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter drawn to the formation of ring condensation for the lactonizing a product not required by Invention I;
  - (c) the inventions require a different field of search for each of the above Inventions requiring searching different classes/subclasses as well as electronic resources employing different search queries);
  - (d) the prior art applicable to one invention would not likely be applicable to another invention;
  - (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement

Application/Control Number: 10/583,434

Art Unit: 1657

may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Application/Control Number: 10/583,434

Art Unit: 1657

4. Applicant is reminded that upon the cancellation of claims to a non-elected

invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by

a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. The lengthy specification has not been checked to the extent necessary to

determine the presence of all possible minor errors. Applicant's cooperation is

requested in correcting any errors of which applicant may become aware in the

specification.

 Any inquiry concerning this communication or earlier communications from the examiner should be directed to HERBERT J. LILLING whose telephone number is 571-272-0918. The examiner can normally be reached on WORK AT HOME

MAXIFLEX.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JON WEBER can be reached on 571-272-0925. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.usplo.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
